

# Cable Drum, Tubing and Container Trailers BKT 18 up to BKT 80

BKT 18, BKT 23 and BKT 27

Easy loading

o High versatility

o Excellent trailing performance

BKT 60 and BKT 80

Specifications are subject without notice. Output details are depending on use conditions..

# Bagela®

BKT 23/27 hot-dip galvanised and painted with drum drive

### Trailing Performance

The twin-axle chassis with axle balancing system readily absorbs severe shocks and high axle loads, even when crossing rough and bumpy ground.

The trailer runs smoothly and does not jump. The extreme loads generated by starting and braking are damped down and thus transmitted only partly to the hook of the towing vehicle.

Unhooked from the towing vehicle, the empty trailer can be easily manoeuvred by hand, owing to its weight being concentrated on the rear side.

BKT 23 with carrier set for micro pipe drums

### Versatility

Trailers of the series BKT 18 up to BKT 27 are applicable for transporting HDPE-tubing drums, cable drums, Pipe coil cages, Loading platforms and carrier set for up to 9 micro pipe drums

### Easy Loading

Irrespective of ground conditions one man can load the trailer in a couple of minutes. The trailer shifts the cable drum into pick up position by fingertip control and hauls it to trailing position between the axles.

BKT 60 while tilting of bulk cargo

### High Versatility as Multipurpose Trailer

Although a necessary investment, a cable trailer can hardly be used for anything else but cable transport.

Not so a Bagela cable trailer of the BKT series.

With a few modifications it can easily be changed into a trailer for carrying tipping containers of up to 9 m<sup>3</sup> capacity.

Besides being a modern cable transporting and laying trailer of the latest engineering standard, this multipurpose concept will help to solve your on-site problems in respect of material supplies and waste disposal.
